# CNOM recertification report

- 2 meetings per year (NOMS/IM and GLOBECOM)
- Website
  - <http://cnom.tssg.org/> (current address)
  - Being updated and moved to a ComSoc domain
- Mailing list
  - [cnom@comsoc.org](mailto:cnom@comsoc.org) with 1299 subscribers
  - Completed to move to a ComSoc domain
- We were suggested to consider collaborations with the TCs on Communications Quality and Reliability, Communications Software, and Internet
- We were suggested to nominate several CNOM members as Distinguished Lecturers

# IEEE fellows from CNOM

- We wanted to map who are the IEEE fellows coming from the network and services management community
- Methodology
  1. List all TPC members from NOMS and IM from 2004 to 2014 → Our definition of “community” for this purpose
  2. For each member, check on IEEE database whether he/she is a fellow
  3. Keep track of fellows along the years

# IEEE fellows from CNOM

- Out of 314 TPC members (no duplicates), 10 were found in the IEEE database → 3% only!
  - 1993: Aurel Lazar
  - 1994: Manu Malek
  - 1995: Shri Goyal
  - 1996: Doug Zuckerman
  - 2003: Prosper Chemouil
  - 2006: Henning Schulzrinne, Lixia Zhang, Randy Katz
  - 2010: Joseph Hellerstein
  - 2011: Morris Sloman
  - 2012: Raouf Boutaba
  - 2014: Puneet Sharma
- How could we support CNOM members and increase the number of applications?

# Test of time award

- Observe the past (10 ~ 15 years) and recognize papers that remained relevant

# Network and Services Management Taxonomy

- Purpose:
  - For authors: fixed keywords to chose from
  - For reviewers: fixed keywords to indicate area of expertise / interest.  
No need to continuously enter expertise again
  - For organizers: match papers and reviewers
  - ***Improve Quality of Reviews***
- Has been implemented within the JEMS system and used for MANWEEK 2009, NOMS 2010, CNSM 2011, NOMS 2012, CNSM 2012, IM 2013, NOMS 2014
- <http://www.simpleweb.org/ifip/taxonomy.html>
- New version!
  - Work done by the Flamingo NoE (in 2013)
  - Large interview campaign with industry and academia
  - Review of ALL recent published papers in the community

# Questionnaire Organization

*Please provide 10 unsolved challenges/problems that need to be addressed by network management systems, including the target network/service. (max 500 characters description per challenge/problem)*
